HOW TO USE THIS BOOK

Save the ideas. Keep the questions.

Compare framed fronts, country-inspired rooms, warmer timber tones and more decorative compositions. Identify the profiles and relationships you prefer, then separate the cabinetry decisions from the decoration and equipment around them.

Each design spread links to a relevant product range or selection guide. Keep the page number with your comments when you prepare the project brief.

From a visual direction to a useful brief.

Character comes from the details.

01 / Describe the room

Share a measured plan, the intended activities and the items the space should contain.

02 / Select the details

Save preferred pages and identify the visible features, finishes and arrangements you want to discuss.

03 / Confirm the package

Review selected-item information, samples, quantities and the itemised supply scope before approval.

Foshan Bridge provides furniture, cabinetry and building-material sourcing and trade supply. The references in this book communicate design directions; selected products, materials, dimensions and included items are confirmed through the project specification.

Start with Traditional Kitchen Cabinets or discuss your project brief.

Start with a framed front.

A recognisable profile creates the cabinet language.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The framed door direction gives the kitchen a clear rhythm. Its character comes from the relationship between the outer frame and central panel, together with handles and exposed ends. Compare an actual door sample rather than treating every framed design as the same profile.

PLAN IT FOR YOUR ROOM

Record the selected front reference and finish. Review frame proportions and matching end panels on the elevation. Confirm handles and visible edge details separately.

Continue with Shaker Kitchen Cabinets to compare the related range and connect these choices with your project brief.

A more decorative composition.

Review the details as a coordinated set.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The light-coloured kitchen uses more pronounced profiles and decorative elements. The room effect involves cabinet fronts, top junctions and surrounding finishes working together. Identify the specific details you prefer so the enquiry can distinguish cabinetry from lighting, furniture and room decoration.

PLAN IT FOR YOUR ROOM

Ask for the proposed door sample and elevation. Mark cornices, decorative ends and other selected features. Keep the included cabinet details explicit in the quotation.

Continue with French Country Kitchen Cabinets to compare the related range and connect these choices with your project brief.

Give profiles space to read.

Repeated divisions should relate to the complete elevation.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A classic front can become visually busy if every section is chosen independently. Review the rhythm of doors and drawers across the room, including the island and tall cabinets. The aim is to coordinate the visible composition with the storage and equipment rather than add detail without a purpose.

PLAN IT FOR YOUR ROOM

Check the appliance schedule and cabinet divisions together. Identify repeated profile details and any deliberate exceptions. Confirm the finish sample before approving the complete elevation.

Continue with Traditional Kitchen Cabinets to compare the related range and connect these choices with your project brief.

A cream-toned island room.

Use the island to organise the composition.

DESIGN DIRECTION

The light framed cabinets and central island create a coordinated, furniture-like direction. The island is a useful reference for discussing visible ends and the relationship with seating. Keep the cabinet package separate from the decorative objects and lighting that contribute to the photographed room.

PLAN IT FOR YOUR ROOM

Review the island footprint, openings and surrounding circulation. Allocate storage and seating roles. Identify the fronts, exposed ends and top as distinct specification fields.

Continue with Traditional Kitchen Cabinets to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

A light country direction.

Balance the cabinetry with the room finishes.

DESIGN DIRECTION

Pale cabinet fronts and a country-inspired room treatment create a softer visual direction. Much of the effect comes from the combination of cabinetry, walls, surfaces and accessories. Select the cabinet profile and proportions first, then record which surrounding elements belong in the project package.

PLAN IT FOR YOUR ROOM

Prepare the measured layout and equipment list. Compare samples with adjacent finishes. Separate cabinet details from splashback, lighting and loose furniture in the enquiry.

Continue with Country Kitchen Cabinets to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

Colour beneath exposed beams.

Separate the front choice from the wider interior.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

Blue cabinetry and the surrounding beams give this room a distinct country character. The cabinet colour is only one part of that effect. Use the reference to identify a preferred palette and front language, then decide how they will translate to the actual room and its structural conditions.

PLAN IT FOR YOUR ROOM

Approve a physical colour sample. Identify panel profiles, handles and exposed ends. Do not assume that ceiling, beams or other room elements are included with the cabinetry.

Continue with Blue Kitchen Cabinets to compare the related range and connect these choices with your project brief.

Add a glazed upper section.

Visible interiors need their own finish decisions.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The lighter cabinets and glazed upper fronts introduce display into the kitchen elevation. The visible contents and cabinet interiors become part of the room composition. Compare the amount of glass with the closed storage required, then define the internal arrangement alongside the door sample.

PLAN IT FOR YOUR ROOM

Agree glass appearance, shelf positions and visible internal finishes. Identify any lighting equipment separately. Check access and the storage assigned to the glazed sections.

Continue with Glass Kitchen Cabinets to compare the related range and connect these choices with your project brief.

Repeat the light front language.

Keep the composition coherent across different cabinet sizes.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A light country-inspired arrangement shows how a repeated front direction can connect several parts of the kitchen. The proportions still change between drawers, base doors and taller sections. Review those differences on the elevation so the selected profile remains coherent across the complete cabinet package.

PLAN IT FOR YOUR ROOM

Request elevations with the actual front divisions. Check the selected handles and surrounding clearances. Record end panels and top junctions rather than leaving them implicit.

Continue with Country Kitchen Cabinets to compare the related range and connect these choices with your project brief.

A warmer timber-tone run.

Colour and visible grain direction shape the room.

DESIGN DIRECTION

The warmer cabinet direction gives this narrower kitchen a different character from a pale painted-look composition. Use it to discuss tone, grain appearance and the relationship to the working top. The photograph does not establish a timber species or substrate; those belong in the selected supplier specification.

PLAN IT FOR YOUR ROOM

Ask for the proposed finish and construction information. Approve a sample and grain direction. Review the complete run, equipment access and exposed end conditions together.

Continue with Wood Kitchen Cabinets to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

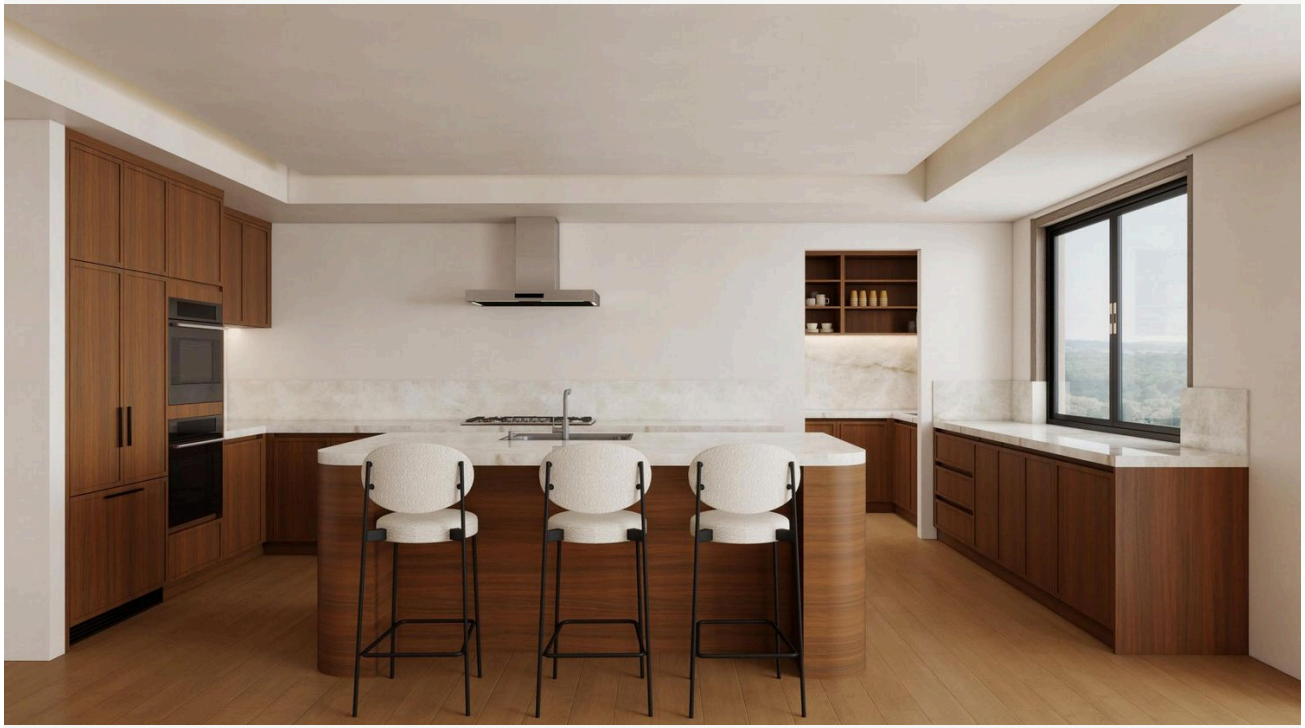

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Mix warmer bases with light uppers.

A country palette can be deliberately mixed.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The darker lower cabinets and lighter upper group create a layered room composition. The contrast changes the weight of each cabinet zone while allowing a shared profile language. Compare the meeting points and handles as a set rather than choosing each group from unrelated samples.

PLAN IT FOR YOUR ROOM

Record the finish allocation on the elevation. Approve the samples together with the top and adjacent surfaces. Identify intentional differences in front profiles or hardware.

Continue with Two Tone Kitchen Cabinets to compare the related range and connect these choices with your project brief.

Compare the choices that matter.

Use this as a discussion sheet, then confirm the actual selected-item information.

DIRECTION	USE IT TO DISCUSS	CHECK TOGETHER
Start with a framed front	The framed door direction gives the kitchen a clear rhythm.	Record the selected front reference and finish.
A cream-toned island room	The light framed cabinets and central island create a coordinated, furniture-like direction.	Review the island footprint, openings and surrounding circulation.
Add a glazed upper section	The lighter cabinets and glazed upper fronts introduce display into the kitchen elevation.	Agree glass appearance, shelf positions and visible internal finishes.
Mix warmer bases with light uppers	The darker lower cabinets and lighter upper group create a layered room composition.	Record the finish allocation on the elevation.

Keep the specification connected.

The image establishes a direction. The selected package needs a written record.

Review a representative sample and the actual selected-item information. Confirm values and claims from the relevant supplier documentation, then record the approval against the item and drawing revision.

Continue with the materials and specifications guide.

Profile language

Door sample, frame proportions, cornices, exposed ends and decorative panel decisions.

Room & equipment

Measured layout, appliance schedule, working surfaces and practical circulation.

Finish coordination

Approved colour/texture samples, handles and the relationship to surrounding finishes.

Scope boundaries

Cabinetry, lighting, loose furniture, room decoration and equipment separated in the quote.

Prepare a more useful enquiry.

Attach the plan and saved references. Mark the decisions that are ready and the questions still open.

Room & layout

- [ ] Measured plan / opening schedule attached
- [ ] Room use, equipment and access identified

Preferred direction

- [ ] Saved page numbers and comments attached
- [ ] Selected references and finish samples listed

Quantities & scope

- [ ] Item quantities and included components listed
- [ ] Supply and installation boundaries identified

Project coordination

- [ ] Destination and requested schedule provided
- [ ] Open questions and drawing revision recorded
