HOW TO USE THIS BOOK

**Save the ideas. Keep the questions.**

Compare bed silhouettes, headboards, bedside pieces and dressing furniture. Begin with the room and mattress requirements, then coordinate the furniture footprint, visible finishes and practical use of the complete bedroom.

Each design spread links to a relevant product range or selection guide. Keep the page number with your comments when you prepare the project brief.

# From a visual direction to a useful brief.

Plan the bed and the furniture around it.

### 01 / Describe the room

Share a measured plan, the intended activities and the items the space should contain.

### 02 / Select the details

Save preferred pages and identify the visible features, finishes and arrangements you want to discuss.

### 03 / Confirm the package

Review selected-item information, samples, quantities and the itemised supply scope before approval.

Foshan Bridge provides furniture, cabinetry and building-material sourcing and trade supply. The references in this book communicate design directions; selected products, materials, dimensions and included items are confirmed through the project specification.

Start with Bedroom Furniture or discuss your project brief.

# Start with the bedroom group.

The bed and surrounding furniture share the same plan.

### DESIGN DIRECTION

A bedroom composition connects the bed, headboard and bedside furniture. Begin with the actual mattress requirements and room openings, then review the footprint of the complete group. The room reference is useful for coordination, while each furniture item still needs its own selected specification.

### PLAN IT FOR YOUR ROOM

Provide the room plan and mattress information. Identify included bed components and bedside pieces. Check circulation, access and the assembly arrangement.

Continue with Bedroom Furniture to compare the related range and connect these choices with your project brief.

# A wider headboard direction.

Review the wall composition beyond the mattress.

### SAVE THE DIRECTION

### DESIGN DIRECTION

A wide headboard can connect the bed with the space around the bedside furniture. The visible width becomes part of the room elevation rather than only the bed outline. Confirm how the selected item is divided, supported and installed before coordinating sockets or adjacent finishes.

### PLAN IT FOR YOUR ROOM

Request the actual dimensions and component arrangement. Review upholstery or finish samples. Check wall interfaces, bedside positions and delivery access with the room plan.

Continue with Bedroom Furniture to compare the related range and connect these choices with your project brief.

# A visible base and open floor.

The lower outline changes the visual weight of the bed.

## DESIGN DIRECTION

The raised-looking bed base gives a different appearance from a fully enclosed plinth. Its relationship to the mattress and headboard should be reviewed as a group. The image does not establish the support construction or included base components; those details belong in the selected supplier information.

## PLAN IT FOR YOUR ROOM

Confirm mattress compatibility, overall dimensions and base construction. Identify included support components and feet. Review the assembly and delivery requirements for the selected item.

# A buttoned headboard direction.

Upholstery detail can become the main feature.

### DESIGN DIRECTION

The buttoned surface gives the headboard a more decorative character. Compare the scale of the detail with the size of the bed and the surrounding wall. Select upholstery and stitching as part of the actual item review rather than expecting a screen image to define the final fabric or colour.

### PLAN IT FOR YOUR ROOM

Request a representative upholstery sample and item dimensions. Confirm the selected detail, visible edges and included bed components. Check delivery access for the headboard sections.

Continue with Bedroom Furniture to compare the related range and connect these choices with your project brief.

# A taller headboard silhouette.

Consider the headboard within the room elevation.

## DESIGN DIRECTION

A taller-looking headboard places more emphasis on the wall behind the bed. Its effect depends on ceiling height, bedside furniture and adjacent lighting. Use the reference to discuss proportion, then review the selected dimensions and mounting arrangement against the actual room.

## PLAN IT FOR YOUR ROOM

Provide the bed-wall elevation and socket positions. Confirm components, finish and fixing information. Separate the headboard, bed base and mattress in the item schedule.

# Coordinate the bedside pieces.

Small furniture still needs a complete specification.

## DESIGN DIRECTION

The bedside furniture relates closely to the bed and headboard, but its storage and surface use should be considered separately. Identify what belongs beside the bed and whether it needs a drawer, an open shelf or a clear top. Coordinate visible finishes without assuming all pieces share the same construction.

## PLAN IT FOR YOUR ROOM

Check dimensions alongside the selected bed. Request drawer, hardware and finish information. Confirm quantities and identify lighting or accessories as separate items.

# An open bedside shelf.

Visible storage changes the way the piece is used.

## DESIGN DIRECTION

The open section gives the bedside piece a lighter visual direction and a place for items kept within reach. Its usefulness depends on the intended contents and its position beside the bed. Review the visible interior as part of the finish selection.

## PLAN IT FOR YOUR ROOM

List the items to be stored. Confirm the overall dimensions, shelf arrangement and proposed construction. Approve exterior and visible interior finishes together.

### DESIGN DIRECTION

A more enclosed bedside piece creates a different balance from open shelving. The front divisions and handles influence its relationship with the bed, while the interior determines what it can store. Keep both views in the selected-item review.

### PLAN IT FOR YOUR ROOM

Request dimensions and internal arrangement. Check drawer or door operation beside the bed. Record hardware, finish samples and included quantities in the furniture schedule.

Continue with Bedroom Furniture to compare the related range and connect these choices with your project brief.

# A separate dressing table.

Plan the surface, mirror and seating together.

## DESIGN DIRECTION

The dressing table adds a working surface within the bedroom. Its role depends on the items used there and on the relationship with a mirror and seat. The furniture footprint, adjacent openings and any power requirements belong in the room plan from the start.

## PLAN IT FOR YOUR ROOM

List the intended contents and equipment. Confirm dimensions, drawer arrangement and finish. Identify mirror and stool inclusion separately from the table itself.

# A concealed mirror direction.

Review both the closed form and the operating position.

## DESIGN DIRECTION

The illustrated furniture shows a compact dressing arrangement with a concealed mirror direction. The closed silhouette is only part of the decision. Ask for the actual opening and support details so the selected piece can be reviewed for the intended routine and room position.

## PLAN IT FOR YOUR ROOM

Request the selected-item information and operating dimensions. Check the seating position and storage arrangement. Confirm the mirror, fittings and assembly scope as individual inclusions.

# Compare the choices that matter.

Use this as a discussion sheet, then confirm the actual selected-item information.

| DIRECTION | USE IT TO DISCUSS | CHECK TOGETHER |
|---|---|---|
| **Start with the bedroom group** | A bedroom composition connects the bed, headboard and bedside furniture. | Provide the room plan and mattress information. |
| **A buttoned headboard direction** | The buttoned surface gives the headboard a more decorative character. | Request a representative upholstery sample and item dimensions. |
| **An open bedside shelf** | The open section gives the bedside piece a lighter visual direction and a place for items kept within reach. | List the items to be stored. |
| **A concealed mirror direction** | The illustrated furniture shows a compact dressing arrangement with a concealed mirror direction. | Request the selected-item information and operating dimensions. |

# Keep the specification connected.

The image establishes a direction. The selected package needs a written record.

Review a representative sample and the actual selected-item information. Confirm values and claims from the relevant supplier documentation, then record the approval against the item and drawing revision.

Continue with the materials and specifications guide.
