HOW TO USE THIS BOOK

Save the ideas. Keep the questions.

Explore fitted dining walls, sideboards, coffee areas and display storage. Use the images to define a preferred direction, then connect that direction with the objects, appliances and everyday activities of the dining space.

Each design spread links to a relevant product range or selection guide. Keep the page number with your comments when you prepare the project brief.

From a visual direction to a useful brief.

A considered place to serve and store.

01 / Describe the room

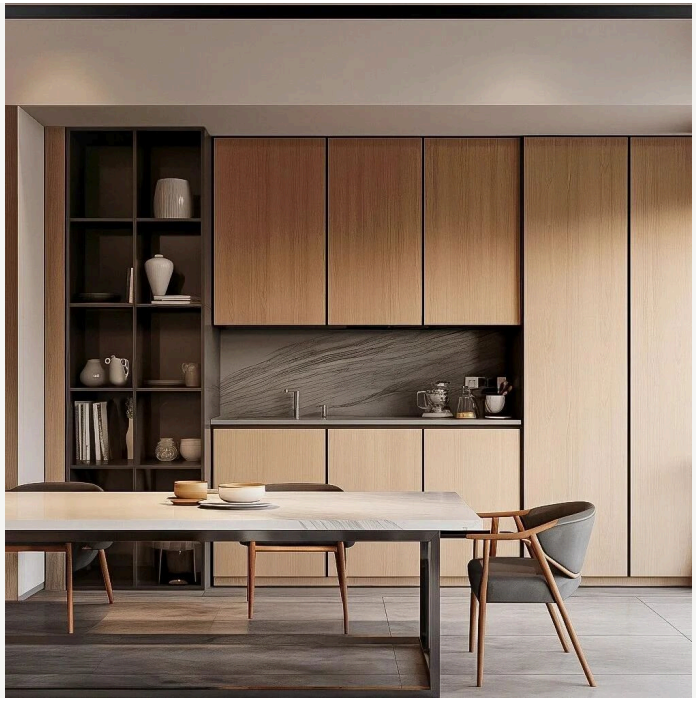
Share a measured plan, the intended activities and the items the space should contain.

02 / Select the details

Save preferred pages and identify the visible features, finishes and arrangements you want to discuss.

03 / Confirm the package

Review selected-item information, samples, quantities and the itemised supply scope before approval.



Foshan Bridge provides furniture, cabinetry and building-material sourcing and trade supply. The references in this book communicate design directions; selected products, materials, dimensions and included items are confirmed through the project specification.

Start with Dining & Bar Cabinets or discuss your project brief.

A sideboard wall for dining.

Coordinate the serving surface with the table.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The timber-tone cabinet wall provides a backdrop to the dining table and a surface for serving or display. The proportions of the two furniture groups should be considered together. Choose the cabinet arrangement around the items used in the dining area, then refine the appearance with the finish and front details.

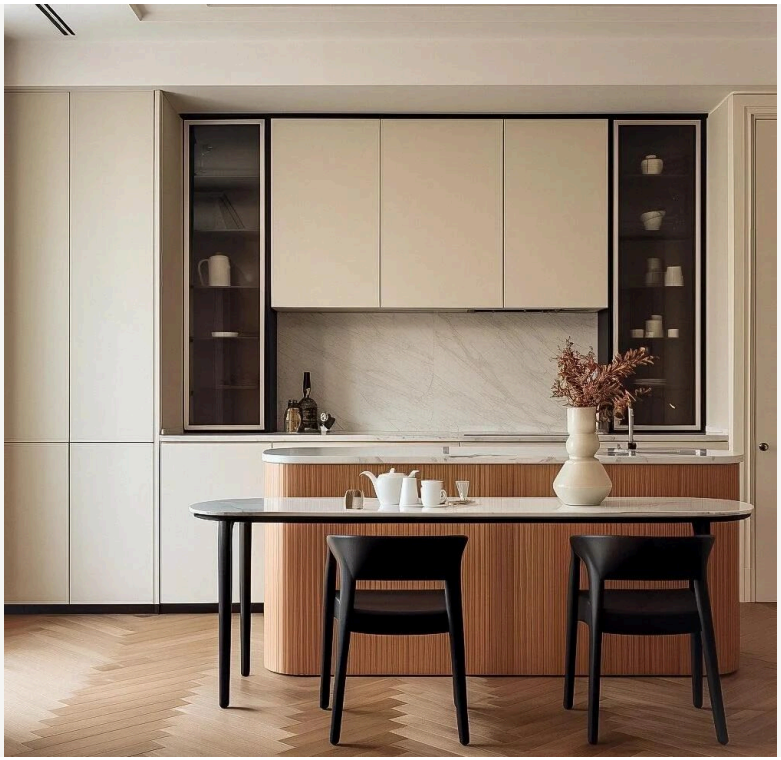
PLAN IT FOR YOUR ROOM

List crockery, serving pieces and appliances that need a place. Mark the table and chairs on the plan so doors and drawers can be opened in normal use. Define the working surface and visible cabinet ends in the quotation.

Continue with Sideboards & Buffet Cabinets to compare the related range and connect these choices with your project brief.

A lighter, more framed direction.

A dining cabinet can share the language of the room.



DESIGN DIRECTION

Pale framed fronts and glazed side sections create a more classic cabinet backdrop. The dining table remains the centre of the activity, while the cabinetry organises storage and display around it. Compare the amount of glazed storage with the closed space you actually need for everyday dining items.

PLAN IT FOR YOUR ROOM

Approve the front profile, glass appearance and handle positions together. Identify the items intended for each cabinet section. Check the tabletop, chair movement and cabinet openings on the same room plan.

Continue with Dining & Bar Cabinets to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Give the coffee area its own place.

A prepared appliance zone helps organise the elevation.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The cabinet composition includes a work surface, visible appliances and glass-front storage. It is a useful direction for discussing a coffee or drinks area as part of the dining room. Separate the cabinet choices from the equipment choices so the appearance and the included supply scope remain clear.

PLAN IT FOR YOUR ROOM

Provide the proposed appliance models and identify their installation requirements. Mark power, water or ventilation needs where relevant to those models. Confirm which appliances, fittings and accessories are included and which are supplied separately.

Continue with Dining & Bar Cabinets to compare the related range and connect these choices with your project brief.

A quieter recessed composition.

Use a niche to define the working area.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The recessed work surface and low storage create a contained dining or drinks zone. Open shelves provide a place for selected objects while the closed fronts keep other contents out of view. The depth of the niche and the relationship to the room should be reviewed with the intended uses.

PLAN IT FOR YOUR ROOM

List the objects and equipment that must fit within the niche. Check access to the working surface and adjacent seating. Agree the visible side panels, back surface and any lighting or power coordination as distinct specification items.

Continue with Sideboards & Buffet Cabinets to compare the related range and connect these choices with your project brief.

Mix display and concealed storage.

Let each section serve a defined purpose.

DESIGN DIRECTION

A tall glazed section sits beside the working surface and closed cupboards. The contrast gives the elevation more than one storage role without requiring every cabinet to be open or glazed. Think first about how drinks, glasses and serving items will be used, then decide which parts should remain visible.

PLAN IT FOR YOUR ROOM

Map the contents onto the proposed elevation. Confirm shelf positions and visible interior finishes. Identify any appliance space and ask how service access will be retained after the cabinet is installed.

Continue with Dining & Bar Cabinets to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Turn the corner with the room.

A cabinet return needs a coordinated drawing.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The illustrated cabinetry continues around a corner, with glazed display at the change in direction. The return becomes part of the dining room composition rather than a separate cupboard added later. Use this idea to discuss the complete elevation and the way the cabinet meets neighbouring walls and openings.

PLAN IT FOR YOUR ROOM

Provide a measured corner plan and both wall elevations. Check door operation and the accessible storage at the return. Agree which ends, side panels and junctions remain visible before selecting the final surface finishes.

Continue with Dining & Bar Cabinets to compare the related range and connect these choices with your project brief.

A more equipped serving wall.

Define the equipment and cabinet package separately.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The long working surface, closed drawers and glazed upper storage create a more equipped serving direction. The image can help communicate the preferred arrangement, but the actual appliance models and connections determine many of the details. Keep those decisions connected to the cabinetry drawing and quotation.

PLAN IT FOR YOUR ROOM

Identify every proposed appliance and its required opening or installation arrangement. Confirm the storage assigned to food preparation, glasses and serving. Review the included equipment and fittings line by line rather than assuming that everything visible is supplied.

Continue with Dining & Bar Cabinets to compare the related range and connect these choices with your project brief.

A freestanding sideboard.

A single piece can define a dining storage zone.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The curved-ended sideboard offers a different approach from a complete fitted cabinet wall. It can be selected as a furniture item with a distinct footprint, front and top. Compare the role of the piece in the room before deciding whether the project needs freestanding storage or a fitted composition.

PLAN IT FOR YOUR ROOM

Check the overall dimensions, door operation and the items to be stored. Request the proposed finish and construction information for the selected item. Review delivery access and the relationship with the dining table and circulation.

Continue with Sideboards & Buffet Cabinets to compare the related range and connect these choices with your project brief.

Compare the choices that matter.

Use this as a discussion sheet, then confirm the actual selected-item information.

DIRECTION	USE IT TO DISCUSS	CHECK TOGETHER
A sideboard wall for dining	The timber-tone cabinet wall provides a backdrop to the dining table and a surface for serving or display.	List crockery, serving pieces and appliances that need a place.
Give the coffee area its own place	The cabinet composition includes a work surface, visible appliances and glass-front storage.	Provide the proposed appliance models and identify their installation requirements.
Mix display and concealed storage	A tall glazed section sits beside the working surface and closed cupboards.	Map the contents onto the proposed elevation.
A freestanding sideboard	The curved-ended sideboard offers a different approach from a complete fitted cabinet wall.	Check the overall dimensions, door operation and the items to be stored.

Keep the specification connected.

The image establishes a direction. The selected package needs a written record.

Review a representative sample and the actual selected-item information. Confirm values and claims from the relevant supplier documentation, then record the approval against the item and drawing revision.

Continue with the materials and specifications guide.

Room & serving

Table and chair positions, cabinet footprint, door operation and intended activities.

Contents & equipment

Crockery, glasses, serving items, appliance models and their installation information.

Fronts & surfaces

Profiles, glass, working surface, visible edges and approved finish samples.

Included scope

Cabinets, fittings, lights, appliances and connections identified as separate items.

Prepare a more useful enquiry.

Attach the plan and saved references. Mark the decisions that are ready and the questions still open.

Room & layout

- ☐ Measured plan / opening schedule attached
- ☐ Room use, equipment and access identified

Preferred direction

- ☐ Saved page numbers and comments attached
- ☐ Selected references and finish samples listed

Quantities & scope

- ☐ Item quantities and included components listed
- ☐ Supply and installation boundaries identified

Project coordination

- ☐ Destination and requested schedule provided
- ☐ Open questions and drawing revision recorded
