HOW TO USE THIS BOOK

**Save the ideas. Keep the questions.**

Compare shoe storage, seating, hanging areas and complete entrance walls. Choose the useful functions first, then bring the door movement, circulation and visible finishes into the same entrance brief.

Each design spread links to a relevant product range or selection guide. Keep the page number with your comments when you prepare the project brief.

# From a visual direction to a useful brief.

Start with the arrival routine.

### 01 / Describe the room

Share a measured plan, the intended activities and the items the space should contain.

### 02 / Select the details

Save preferred pages and identify the visible features, finishes and arrangements you want to discuss.

### 03 / Confirm the package

Review selected-item information, samples, quantities and the itemised supply scope before approval.

Foshan Bridge provides furniture, cabinetry and building-material sourcing and trade supply. The references in this book communicate design directions; selected products, materials, dimensions and included items are confirmed through the project specification.

Start with Entryway Cabinets or discuss your project brief.

# A complete arrival wall.

Connect hanging, seating and closed storage.

### SAVE THE DIRECTION

Note the page and the particular details you prefer.

### DEFINE THE ITEM

Use a selected reference, sample and written specification.

### CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

### DESIGN DIRECTION

The cabinet wall gives the entrance a defined sequence of uses: somewhere to hang items, sit down and put things away. The open niche breaks up the closed fronts and makes the everyday functions visible. Start with the household routine, then decide how much storage belongs at the entrance.

### PLAN IT FOR YOUR ROOM

List coats, shoes, bags and other items that need a place. Show the entrance door and circulation on the plan. Agree the bench, hooks, internal storage and exposed ends as part of the same cabinet package.

Continue with Entryway Cabinets to compare the related range and connect these choices with your project brief.

# A simple hanging and seating zone.

A restrained arrangement can still support daily routines.

### SAVE THE DIRECTION

Note the page and the particular details you prefer.

### DEFINE THE ITEM

Use a selected reference, sample and written specification.

### CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

### DESIGN DIRECTION

The open hanging rail and bench give the entrance a clear purpose without a complete wall of cupboards. This direction is useful when you want to keep a lighter visual presence. The usefulness of the arrangement depends on what needs to be placed there at the beginning and end of the day.

### PLAN IT FOR YOUR ROOM

Record the items to hang and store, then check the bench position against the door movement. Confirm the supporting structure and proposed materials. Include any hooks, rails or loose seating elements explicitly in the schedule.

Continue with Shoe Cabinets with Benches to compare the related range and connect these choices with your project brief.

# Organise shoes by use.

The interior matters as much as the closed front.

### SAVE THE DIRECTION

Note the page and the particular details you prefer.

### DEFINE THE ITEM

Use a selected reference, sample and written specification.

### CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

### DESIGN DIRECTION

The open view reveals separate storage areas and a series of shoe shelves. It is a useful way to shift the discussion from the appearance of a shoe cabinet to the contents it should hold. Different shoes and household items may need different arrangements within the same cabinet.

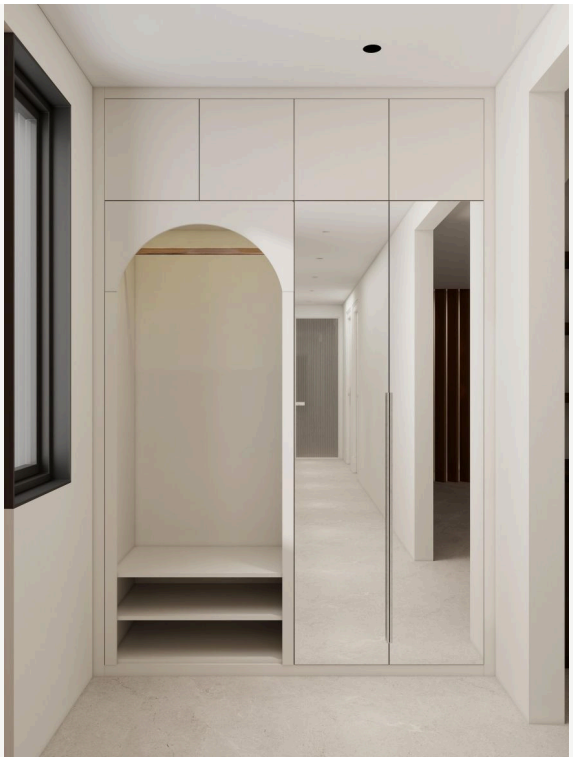
### PLAN IT FOR YOUR ROOM

List the types and approximate quantities of items to be stored. Ask for the proposed shelf layout and opening arrangement. Confirm which shelves or organisers are adjustable and how they are included in the quotation.

Continue with Shoe Cabinets to compare the related range and connect these choices with your project brief.

# Bring a mirror into the entrance.

Coordinate the mirror with storage and circulation.



## DESIGN DIRECTION

The full-height mirror sits beside closed storage and a lower open zone. It connects the entrance routine with a final check before leaving the house. The mirror position should be reviewed with the door, lighting and nearby furniture rather than treated as a decorative panel added after the cabinet design.

## PLAN IT FOR YOUR ROOM

Identify the mirror size and proposed mounting arrangement. Check adjacent cabinet openings and the path through the entrance. Agree the visible frame or edge detail and identify the mirror separately in the scope.

Continue with Entryway Cabinets to compare the related range and connect these choices with your project brief.

### SAVE THE DIRECTION

Note the page and the particular details you prefer.

### DEFINE THE ITEM

Use a selected reference, sample and written specification.

### CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

# A darker, contained niche.

Use contrast to define the daily-use area.

### SAVE THE DIRECTION

Note the page and the particular details you prefer.

### DEFINE THE ITEM

Use a selected reference, sample and written specification.

### CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

### DESIGN DIRECTION

The dark cabinet and open bench niche create a more enclosed arrival point. The contrast makes the hanging and seating area read as a distinct part of the wall. Compare this with a lighter composition in the actual entrance, where room size, openings and other finishes will affect the result.

### PLAN IT FOR YOUR ROOM

Approve the finish sample alongside the floor and wall finishes. Allocate the open niche and closed sections to specific contents. Check the bench, hooks and shoe storage together before confirming the final front arrangement.

Continue with Mudroom Cabinets to compare the related range and connect these choices with your project brief.

# A more traditional storage wall.

Profiles and repeated divisions give the entrance structure.

### SAVE THE DIRECTION

Note the page and the particular details you prefer.

### DEFINE THE ITEM

Use a selected reference, sample and written specification.

### CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

## DESIGN DIRECTION

Framed fronts, an open hanging niche and lower seating create a more traditional direction. The repeated cabinet divisions help the arrangement feel coordinated, while the open area supports the everyday routine. Save the individual details you prefer and decide which should be repeated across the complete wall.

## PLAN IT FOR YOUR ROOM

Review the door profile, handles and visible end panels on an elevation. Confirm the storage assigned to each section. Keep the bench, hooks, shoe shelves and any lighting clearly identified in the itemised quotation.

Continue with Mudroom Cabinets to compare the related range and connect these choices with your project brief.

# Compare the choices that matter.

Use this as a discussion sheet, then confirm the actual selected-item information.

| DIRECTION | USE IT TO DISCUSS | CHECK TOGETHER |
| --- | --- | --- |
| **A complete arrival wall** | The cabinet wall gives the entrance a defined sequence of uses: somewhere to hang items, sit down and put things away. | List coats, shoes, bags and other items that need a place. |
| **A simple hanging and seating zone** | The open hanging rail and bench give the entrance a clear purpose without a complete wall of cupboards. | Record the items to hang and store, then check the bench position against the door movement. |
| **Bring a mirror into the entrance** | The full-height mirror sits beside closed storage and a lower open zone. | Identify the mirror size and proposed mounting arrangement. |
| **A more traditional storage wall** | Framed fronts, an open hanging niche and lower seating create a more traditional direction. | Review the door profile, handles and visible end panels on an elevation. |

# Keep the specification connected.

The image establishes a direction. The selected package needs a written record.

Review a representative sample and the actual selected-item information. Confirm values and claims from the relevant supplier documentation, then record the approval against the item and drawing revision.

Continue with the materials and specifications guide.

### Entrance & movement

Door swing, clear route, adjacent rooms, cabinet footprint and fixing conditions.

### Household contents

Shoe types, coats, bags, everyday objects and the proposed storage allocation.

### Seating & fittings

Bench, hooks, rails, shelves, organisers and their itemised inclusion.

### Visible selection

Front profile, finish reference, mirror, exposed ends and approved samples.

# Prepare a more useful enquiry.

Attach the plan and saved references. Mark the decisions that are ready and the questions still open.

## Room & layout

- [ ] Measured plan / opening schedule attached
- [ ] Room use, equipment and access identified

## Preferred direction

- [ ] Saved page numbers and comments attached
- [ ] Selected references and finish samples listed

## Quantities & scope

- [ ] Item quantities and included components listed
- [ ] Supply and installation boundaries identified

## Project coordination

- [ ] Destination and requested schedule provided
- [ ] Open questions and drawing revision recorded
