HOSPITALITY FURNITURE & CABINETRY

Coordinate the room package before the item list grows.

A clearer selection, one step at a time.

Use the images to describe a direction. Use the checklist to define the selected package.

HOW TO USE THIS BOOK

Save the ideas. Keep the questions.

Organise guestroom and shared-space ideas into a practical furniture and cabinetry brief. The images are selection directions, not a portfolio of claimed hotel deliveries; room types, quantities and selected-item requirements belong in the project schedule.

Each design spread links to a relevant product range or selection guide. Keep the page number with your comments when you prepare the project brief.

From a visual direction to a useful brief.

Coordinate the room package before the item list grows.

01 / Describe the room

Share a measured plan, the intended activities and the items the space should contain.

02 / Select the details

Save preferred pages and identify the visible features, finishes and arrangements you want to discuss.

03 / Confirm the package

Review selected-item information, samples, quantities and the itemised supply scope before approval.

Foshan Bridge provides furniture, cabinetry and building-material sourcing and trade supply. The references in this book communicate design directions; selected products, materials, dimensions and included items are confirmed through the project specification.

Start with Hotel Furniture or discuss your project brief.

Define a guestroom furniture group.

Begin with the room type and its plan.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A coordinated bedroom image can help establish a guestroom direction, but a hotel package needs its own room-type schedule. The bed, headboard and bedside pieces should be identified as separate items with selected requirements. This reference is a design starting point, not evidence of a completed hotel delivery.

PLAN IT FOR YOUR ROOM

Provide the room-type plan and quantities. Identify bed, mattress and bedside scope separately. Record item references and drawing revisions in the furniture schedule.

Continue with Hotel Furniture to compare the related range and connect these choices with your project brief.

Repeat the bedside decision clearly.

Small repeated items affect the room package.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

Bedside furniture is closely tied to the bed, sockets and lighting arrangement. In a room-type package, repeated items need consistent references and quantities so visual coordination is supported by an accurate schedule. Review storage and surface use as well as the visible finish.

PLAN IT FOR YOUR ROOM

Confirm item dimensions, finish samples and internal arrangement. Coordinate power and lighting with the project team. Identify accessories and loose lighting as separate inclusions.

Continue with Bedroom Furniture to compare the related range and connect these choices with your project brief.

A guest work position.

Coordinate furniture with equipment and services.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A desk or work surface gives the guestroom another defined activity. The selected furniture should be reviewed with seating, sockets, lighting and any equipment. A residential study reference can communicate a direction while the actual hospitality requirements remain specific to the room type.

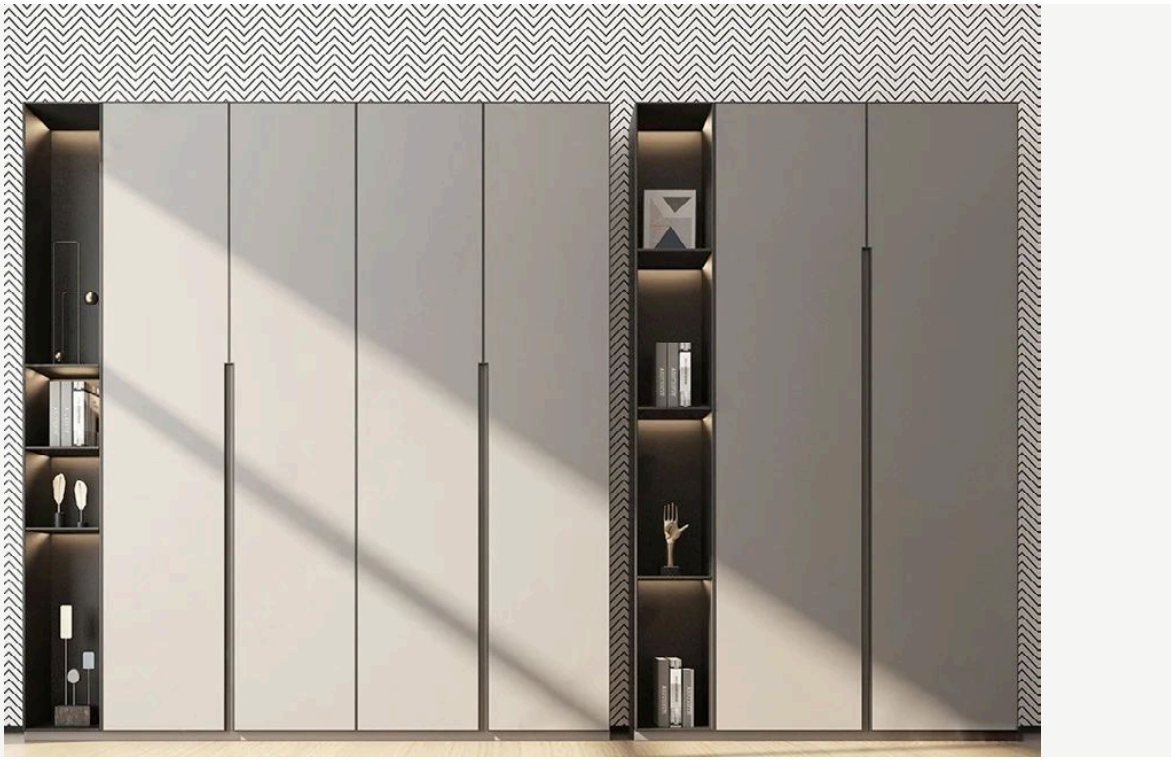
PLAN IT FOR YOUR ROOM

Provide the working-position plan and equipment list. Confirm dimensions, storage and finish. Identify the chair, lighting and service coordination responsibilities separately.

Continue with Study & Home Office Cabinets to compare the related range and connect these choices with your project brief.

A guestroom storage wall.

Allocate the interior to the intended room use.



DESIGN DIRECTION

A fitted wardrobe direction can help organise clothing and other guestroom storage. The closed elevation should be connected to the internal arrangement and any equipment that belongs within the unit. Do not assume that a residential reference already defines a complete hospitality package.

PLAN IT FOR YOUR ROOM

List the required storage functions by room type. Ask for internal elevations and itemised fittings. Coordinate room equipment, door movement and maintenance access with the project team.

Continue with Wardrobes & Closets to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

A screen and low storage direction.

The equipment list belongs in the furniture brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The low media composition provides a restrained direction for screen-related furniture. Its usefulness in a guestroom depends on the actual screen, connections and room layout. Keep the visible cabinet design connected to an equipment schedule rather than treating every similar elevation as the same package.

PLAN IT FOR YOUR ROOM

Confirm screen and equipment references, mounting and cable requirements. Identify storage and access panels. Separate furniture, electrical work and equipment supply in the room schedule.

Continue with TV & Media Cabinets to compare the related range and connect these choices with your project brief.

Coordinate the vanity package.

The bathroom has its own interfaces and evidence needs.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A vanity reference introduces the relationship between the cabinet, basin and mirror within the guestroom bathroom. The project team should define the required item information and installation interfaces. The image alone does not establish materials, performance or compliance for a particular hospitality project.

PLAN IT FOR YOUR ROOM

Provide the bathroom elevation and service positions. Request selected material and construction information. Identify basin, top, mirror, lighting and installation scope separately.

Continue with Bathroom Vanities to compare the related range and connect these choices with your project brief.

An occasional guestroom chair.

Choose the role before the silhouette.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A rounded lounge-chair direction can add a reading or conversation position to a guestroom. The room plan should determine whether that position is useful and how it relates to the bed and table. Select the actual item and supporting information before repeating it across a room type.

PLAN IT FOR YOUR ROOM

Request dimensions, upholstery samples and construction information. Identify any mechanism and its documentation. Check the footprint, access and required project evidence with the team.

Continue with Sofas & Sectionals to compare the related range and connect these choices with your project brief.

A lounge seating group.

Separate shared-space requirements from guestrooms.

DESIGN DIRECTION

The sofa group provides a visual starting point for a shared lounge. Its arrangement and selected items need to follow the actual public-space plan, use and project requirements. A coordinated image should become an item schedule rather than an assumed all-inclusive room package.

PLAN IT FOR YOUR ROOM

List sofas, chairs, tables and accessories individually. Request construction, upholstery and project-required evidence. Check quantities, access and assembly arrangements for the selected items.

Continue with Hotel Furniture to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

A shared dining direction.

Connect the furniture group with the operational layout.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A round dining table can help communicate a preferred arrangement for a shared area. The actual room use, chair selection and circulation determine the package. Review the selected items with the project team instead of inferring seating capacity or suitability from a photograph.

PLAN IT FOR YOUR ROOM

Provide the layout and intended quantities. Request dimensions, materials and relevant documentation for each selected item. Coordinate table, chair and delivery requirements together.

Continue with Dining Room Furniture to compare the related range and connect these choices with your project brief.

A serving and display wall.

Equipment and furniture boundaries should be explicit.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

The fitted serving composition introduces storage, display and a surface for a beverage area. Its actual use may involve equipment and service requirements beyond the cabinet package. Keep those interfaces visible in the hospitality brief so the furniture schedule and equipment list remain connected.

PLAN IT FOR YOUR ROOM

List the intended equipment and contents. Provide service positions and supplier installation information. Identify cabinets, fittings, equipment and connections as separate scope items.

Continue with Dining & Bar Cabinets to compare the related range and connect these choices with your project brief.

Coordinate the room door separately.

Appearance and required documentation are different fields.

DESIGN DIRECTION

The panelled internal-door direction can help connect the entrance with the room palette. The image does not establish fire, acoustic, security or other project performance. Those requirements must be identified by the project team and supported by documentation for the actual selected door assembly.

PLAN IT FOR YOUR ROOM

Provide the opening schedule and project requirements. Identify leaf, frame and hardware scope. Request the relevant selected-product evidence and installation information before approval.

Continue with Doors to compare the related range and connect these choices with your project brief.

SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

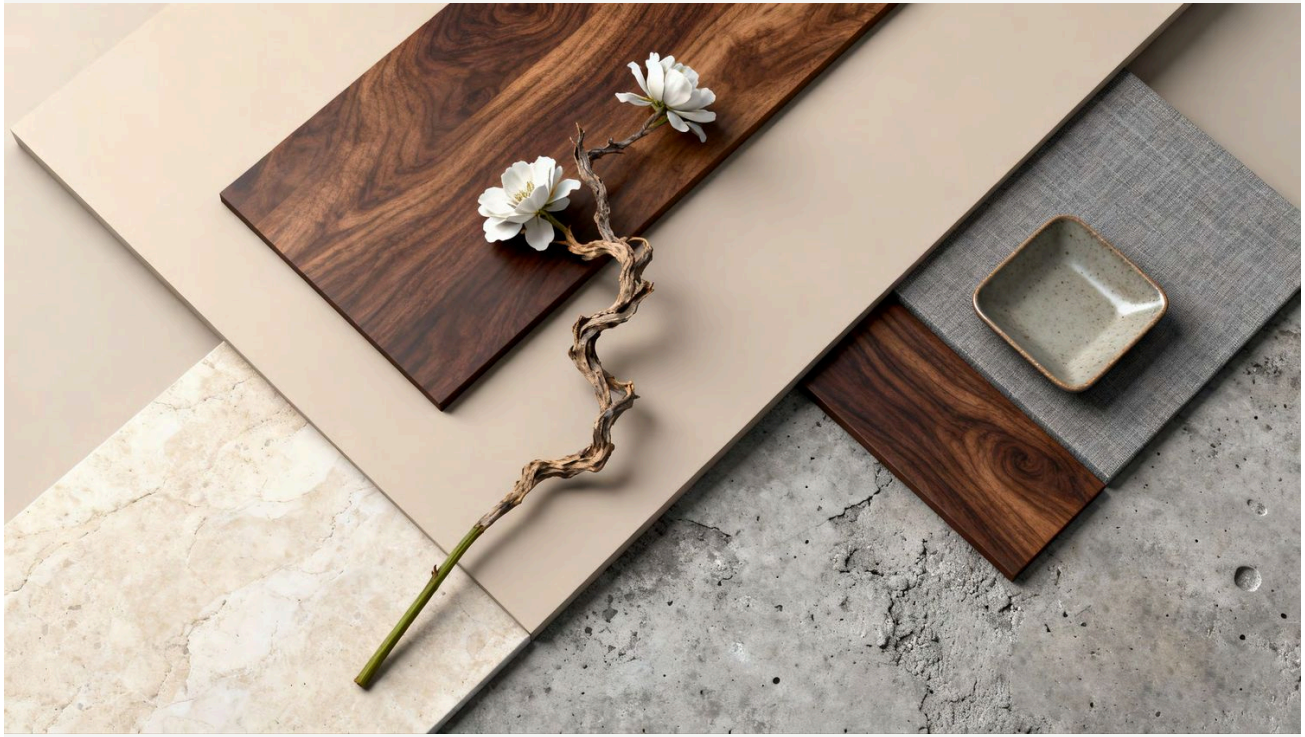
CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

Keep a room-type sample record.

A coordinated package needs a consistent reference.



SAVE THE DIRECTION

Note the page and the particular details you prefer.

DEFINE THE ITEM

Use a selected reference, sample and written specification.

CHECK THE SCOPE

List quantities, fittings and supply responsibilities.

Compare priorities ↗ · Specification checklist ↗

DESIGN DIRECTION

A sample set helps connect furniture, cabinetry and visible room finishes. Each approved reference should be assigned to an item and room type, with any variations recorded deliberately. The project schedule then has a clear link between the visual direction and the selected supplier information.

PLAN IT FOR YOUR ROOM

Label samples and approval dates. Record item IDs, quantities and drawing revisions. Keep outstanding material or documentation questions visible before finalising the supply scope.

Continue with Keep Materials and Specifications in One Clear Record to compare the related range and connect these choices with your project brief.

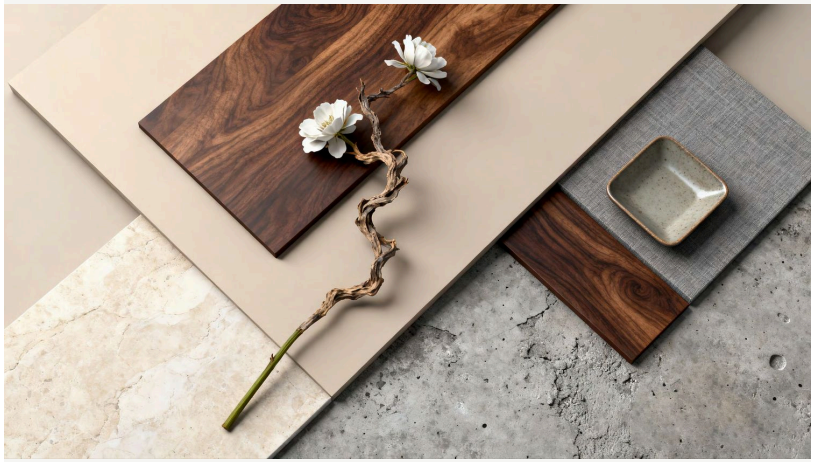
Compare the choices that matter.

Use this as a discussion sheet, then confirm the actual selected-item information.

DIRECTION	USE IT TO DISCUSS	CHECK TOGETHER
Define a guestroom furniture group	A coordinated bedroom image can help establish a guestroom direction, but a hotel package needs its own room-type schedule.	Provide the room-type plan and quantities.
A guestroom storage wall	A fitted wardrobe direction can help organise clothing and other guestroom storage.	List the required storage functions by room type.
A lounge seating group	The sofa group provides a visual starting point for a shared lounge.	List sofas, chairs, tables and accessories individually.
Keep a room-type sample record	A sample set helps connect furniture, cabinetry and visible room finishes.	Label samples and approval dates.

Keep the specification connected.

The image establishes a direction. The selected package needs a written record.



Review a representative sample and the actual selected-item information. Confirm values and claims from the relevant supplier documentation, then record the approval against the item and drawing revision.

Continue with the materials and specifications guide.

Room-type schedule

Room types, quantities, plans, furniture locations and revision references.

Item schedule

Furniture and cabinetry item identifiers, quantities and selected-item requirements.

Materials & evidence

Approved samples, construction information and project-required evidence by item.

Supply boundaries

Equipment, loose furniture, cabinetry, installation and coordination responsibilities.

Prepare a more useful enquiry.

Attach the plan and saved references. Mark the decisions that are ready and the questions still open.

Room & layout

- ☐ Measured plan / opening schedule attached
- ☐ Room use, equipment and access identified

Preferred direction

- ☐ Saved page numbers and comments attached
- ☐ Selected references and finish samples listed

Quantities & scope

- ☐ Item quantities and included components listed
- ☐ Supply and installation boundaries identified

Project coordination

- ☐ Destination and requested schedule provided
- ☐ Open questions and drawing revision recorded
